**24 January 2023**

Dear Parent Carer,

**Child Flu Vaccination**

The flu jab is one of the most important vaccinations offered to keep children protected this winter as the flu virus spreads easily especially in enclosed spaces like the classroom. For children with existing health conditions there is a higher risk of serious illness that could lead to hospitalisation.

As temperatures fall again in the coming weeks, getting vaccinated against flu gives your child that vital extra protection from this dangerous virus which spreads more easily in colder weather when we spend more time with friends and family indoors.

Secondary school-aged children in years 7 through 9 are eligible for a free flu nasal spray. The nasal spray is quick and painless, and most children will be able to get it at their school. If you have missed your child's school vaccination, it's not too late – you can still get a flu vaccine from your GP if your child has a long term health condition and is in the 'at risk' category or your local School Aged Immunisation Service as per the details below.

Visit [www.nhs.uk/wintervaccinations](http://www.nhs.uk/wintervaccinations) or search '**NHS child flu vaccine**' for more information.

Yours faithfully,

Susan Edden  
Consultant in Public Health  
Senior Immunisation Lead
